Version	0.1

If you would like to be added to the Community Infrastructure Levy mailing list to receive updates on the progress on the CIL, please tick the box (please ensure your details have been entered above).

If no, please tell us your reasons for this. Please bear in mind that your reasons should be clearly justified by supporting evidence.

Para 4.35 of the CIL viability study states that "a CIL rate of 80 - 100/square metre for Faringdon, Wantage and Grove and a rate of 120 - 140/square metre elsewhere would not threaten delivery of the plan." As it is necessary to have the maximum possible infrastructure to support the proposed

developments the Council proposes a rate of 100 for Faringdon, Wantage and Grove and 140 elsewhere.
