

dear sirs.

I object most strongly to any reduction in the green belt, but, these two sites are particularly sensitive. wootton village is already dangerously overloaded with vehicles at school times. the whole area is a water

shed which already has caused houses to be flooded on cumnor road so any further development should not further exacerbate this problem. the whole drainage system both foul & storm are presently inadequate and need constant

servicing. any significant development will require much improvement to the general infrastructure

yours sincerely a.j.white 45. wootton village.
