The Planning document establishes that several watercourses within the Local Plan are of national if not international importance as chalk streams. The Project feels that the importance of these water courses is undermined by :

*3.244 The extent of the buffer is dependent on the size and nature of the development, but it should be a minimum of 10 metres wide, measured from the top of each bank'*

We would be urge that the importance of the watercourse in particular the chalk streams is enshrined such that the chalk stream and habitat is protected despite the size and the nature of the development. We would go further to propose a 50m buffer strip (where possible) where development occurs next to a chalk stream to maintain a corridor within which natural processes can occur and natural habitat can be maintained.

6. Please set out what modification(s) you consider necessary to make the Local Plan legally compliant or sound, having regard to the matter you have identified at 5 above. (NB Please note that any non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Preferred wording.

*The extent of the buffer should be a minimum of 10 metres wide, measured*

from the top of each bank but in order to maintain the integrity of the watercourse. Where development occurs outside of an existing settlement the aim will be for a 50m buffer strip from the top of each bank.
