**Further comment:** Please use this space to provide further comment on the relevant questions in this form. **You must state which question your comment relates to.** 

#### The Vale Local Plan Part 2

The inclusion of 130 houses split 80/50 allocated to East Hanney in the Vale Local Plan Part 2 is both alarming and surprising. We were led to believe only one of the two sites, the 50 East of East Hanney, would be included even though we would prefer this also be removed.

#### North of East Hanney site – 80 dwellings

In Ch.2, section 2.33 it states that the larger village of East Hanney offers a good range of services and facilities and is relatively unconstrained as it is not located within the Oxford Green Belt or AREAS OF FLOODPLAIN! It also states that the provision of smaller site allocations is important and necessary to ensure housing is delivered.

To address these points: -

East Hanney is now classified as a smaller village due to the loss of the mobile library.

The range of services and facilities offered include one very small shop run by volunteers, a small post office which does not offer all the services and closes on Saturdays and all weekday afternoons and a local butcher.

Also, one pub, one restaurant and one small primary school where development is restricted due to land constraints.

There are fewer buses running through the village which adversely affects the elderly residents quite badly.

A village hall which is often unavailable due to it being fully booked.

The village hall car park is also the car park for Hanney school, it cannot cope at present and often overflows into nearby roads causing danger and stress to those trying to park and to the residents.

I agree East Hanney is not within the Oxford Green Belt, but I must object to the statement that East Hanney is not located in areas of floodplain, this is totally wrong!

There are areas of flood zones 1, 2 and 3 within East Hanney, the village floods often and causes great anxiety for many residents.

Some of the worst flooding has occurred in Ashfields Lane and Ebbs Lane, halfway down Ebbs Lane is the very lowest point in the village, so all floodwaters tend to run towards this point. Residents of Ebbs Lane have acquired their own water pump to use during these floods, the water is pumped into a field alongside the site North of East Hanney where you have allocated 80 dwellings. This area is important to the village as a floodplain which can absorb water and so help protect East Hanney from flood. 80 dwellings on this site would defiantly add to the probability of flooding.

The A338 running alongside this North site also floods very badly so to choose a site which is bordered by Ebbs Lane, Ashfields Lane and the A338, all significant flood areas is foolhardy.

Ch.2, section 2.33 also states smaller sites deliver houses faster.

East Hanney has delivered well over 200 houses in a relatively short space of time almost doubling its housing stock. There is outline planning permission already given for another 100 dwellings at Dews Meadow, Summertown and the garden nursery, Steventon Road. The

infrastructure of the village can hardly cope at present and certainly will not be able to cope with any further large developments, 80 dwellings constitutes a large development in East Hanney.

Approaching East Hanney from the North the view towards this site is a very attractive rural setting to the built form of the village. This area should be protected and enjoyed by future generations, this is our heritage.

The Detailed Policies and Additional Sites document states that the 200 houses proposed for Summertown, South of East Hanney in Part 1 was removed by the inspector stating that the site did not relate well to the village and was not close to the village's services and facilities. These very same points apply to the site North of East Hanney which is on the very northern fringe of the village and is not closer to these facilities as stated. There is no pedestrian link and the site access onto the busy A338 would create a very dangerous place for the residents.

There are many other negative points associated with this proposed site.

It is adjacent to a conservation area including listed buildings which need protecting from dubious developments.

There would be added road noise and pollution from the generated traffic which is in addition to the already very busy A338 running alongside this North site. Future large developments in Wantage and Grove will also generate more noise and pollution along the A338 from increased traffic flow from these sites. It will not be a healthy place to live and raise a family.

East Hanney is a Dark village, 80 dwellings would add greatly to the light pollution.

Loss of property value would apply to nearby houses.

Over development and high density would ruin the character.

Need is not proven for East Hanney village.

Extending the village into countryside outside of the village envelope is not appropriate.

Also, it is not included in the emerging Neighbourhood Plan for East Hanney. For all the above reasons I request that you **REMOVE** the North of East Hanney site for 80 dwellings from the Vale Local Plan Part 2
