

Please find my response document attached, I have used a large number of form B's to stress my points.

The reference to NALPG stands for the North Abingdon Local Planning Group which comprises a number of residents who have worked together to understand and comment on the plan and I believe generally represent the concerns of many in the North Abingdon area. I am afraid I am not qualified to assess whether the Plan is legally compliant or that it meets the duty to cooperate requirement.

I have attached a photo that shows a view from the proposed site when the A34 was at a standstill. I could not determine the relevant section for this exhibit.

Best regards,

David Beer
