Thank you for your request to provide a representation on the **Vale of White Horse Draft Local Plan part 2** consultation document. The most efficient and accurate way for HSE to make a representation where multiple land allocations are proposed is to analyse the Geographical Information System (GIS) data for the allocations. We would be grateful therefore if you could provide HSE with the land allocation GIS data for your plan by return email. The data should ideally be presented as a single GIS layer, preferably in the MapInfo Professional table file format (.tab), or other file formats that can be translated into Mapinfo.TAB, e.g. ESRI® ShapeFiles (.shp/.shx/.dbf). The associated file table should include the following information about each allocation: 1. A unique allocation reference number2. The allocation address and postcode3. The proposed use class for the allocation or whether it will be mixed use
