

How do I use my sacks?

There are enough sacks for you to use up to four green recycling sacks and three pink rubbish sacks every fortnight up to October 2011.

This is the same capacity as the wheeled bins. Please do not exceed this amount as we will not provide extra sacks. We will supply you with more sacks every 12 months.

Green sacks – mixed recycling

The green sacks are for all your recycling, including:

- mixed paper and card
- steel and aluminium food and drink cans
- aluminium foil
- household plastic packaging such as plastic bottles, food trays, yoghurt pots and plastic bags
- glass bottles and jars
- aerosols
- food and drink cartons (Tetra Paks)

Extra Recycling

Although we will only accept a maximum of four green sacks per collection, you can place extra recycling in either clear or opaque sacks, carrier bags or cardboard boxes next to your four green sacks.

For more information please visit:
www.morerecycling.co.uk or call us on 03000 610610

Food Waste

Use your small kitchen caddy to collect your food scraps then transfer them into the large food waste bin which we'll empty every week.

Pink sacks – rubbish (non recyclables)

The pink sacks are for any rubbish left after you have removed your food waste and recycling.

Things like: **polystyrene, cling film, crisp packets, nappies and sanitary products**

We will only accept a maximum of **three** pink rubbish sacks per collection.

We will not collect any black sacks (unless they are placed inside your pink sacks).

Collection Days

We will collect your food waste every week, and your rubbish and recycling on alternate weeks. Please refer to your calendar for your collection days and further information. Information relating to the green wheeled bins apply to your green sacks and for grey wheeled bins apply to your pink sacks. So, on a green week, put out your food waste and green recycling sacks and on a grey week put out your food waste and pink rubbish sacks.
