

I propose an additional CORE Policy - FARMING should be added on these lines
 "The Council recognizes the vital importance of farming in the Vales, both environmentally and economically, and under no circumstances will permit any development on Grade I and Grade II Agricultural Land, and only in exceptional circumstances, Grade IIIa Land."

Please note your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation at publication stage.

After this stage, further submissions will be only at the request of the Inspector, based on the matters and issues he/she identifies for examination.

7. If your representation is seeking a modification, do you consider it necessary to participate at the oral part of the examination?

☐

No, I do not wish to participate at the oral examination

☒

Yes, I wish to participate at the oral examination

8. If you wish to participate at the oral part of the examination, please outline why you consider this to be necessary: ☐

How can it be argued that the Plan is sustainable if it utterly ignores future food needs? Particularly in view of the forecast of desertification of large swathes of China and India) How on earth - literally on earth - can what ignores the future of our planet be described as good or even sensible planning? On my land I would not, and will not, permit development on Grade I, II or IIIa Land. And can the Inspector insist on a detailed analysis of all such land already lost since the East Plan?

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate at the oral part of the examination.
