**Subject:** Proposed changes to Green Belt - Wootton - Questions that must be answered

Dear Sirs,

Just received notification of the proposed changes to Green Belt land around Wootton, Abingdon. Interestingly the same 3 areas that were proposed building sites a few months ago. Why the new approach ?

These areas are appreciated by the locals and visitors for their beauty, aesthetic and practical qualities, so why build on them, spoiling these features when there is a brownfield site within the village that is undeveloped, an eyesore and has all the utilities present that would be cheaper for a developer to utilise, to build apparently much needed homes. Is it not a pretty enough setting for the developer to make significant money on ?

If subject to scrutiny could the Council honestly and legitimately show that local resident knowledge and viewpoint had been carefully considered and that there was genuinely no alternative ?

Yours Faithfully

J Harrington (Mrs)
