Dear Southvale,

I am looking into the local plan, and I have noticed that the Free school I work for, that will be a primary and secondary that can offer a place to at least 800 children in the near future (we are currently aiming for more), is not mentioned at all in your plan. Is this an oversight?

Regarding the cycle network you mention right above another crossing over the Thames, it would be nice to combine this. A proper cycle bridge which will offer pupils of above mentioned school and employees of the science park a safe crossing including proper traffic lights across the Abingdon road. I hope you can make cycling safe, as I'm sure many people would prefer to cycle.

Kind regards,

Desi Correia
