Subject: The Local Plan 2013 Part 1

Dear Council

I am concerned about the pressures on the infrastructure in Shrivenham if the plan is implemented.

Roads - the sheer volume of traffic locally and on the A420 will be noisy, polluting and dirty as well as increasing the risks of accidents and hazards to pedestrians. School entry/exit times will be very dangerous for the children, parents and others

Parking - 500 houses = at least 500 cars; where will they all park?

Shops and street parking - already a great problem locally

As the senior GP in the local surgery, I will be writing on behalf of the practice, but the surgery premises cannot be extended, and there is a limit to how many patients the surgery can safely accommodate if the highest standards of patient care are to be maintained.

Yours faithfully
Antony Crockett
