*District Council*

South Oxfordshire District Council Vale of White Horse District Council

## **S106 financial contributions and monitoring fees**

The Council will review and update annually the costs in relation to the following:

- street naming and numbering
- provision of recycling bins
- financial obligations for public art
- monitoring of S106 planning obligations

This document should be read in conjunction with the S106 Planning Obligations Supplementary Planning Document. The information below sets out the financial contributions the council will seek to cover directly incurred costs.

### **STREET NAMING AND NUMBERING**

For new development that requires new street names and street nameplates the council will seek a financial contribution of **£268 per 10 houses** through Section 106. Monies should be payable upon implementation.

### **PROVISION OF RECYCLING / REFUSE BINS**

New development will require the provision of new recycling/refuse bins. The council will seek financial contributions for the provision of recycling/refuse bins on sites of 10 and more units through Section 106. On smaller sites of 9 and less units the council will issue an invoice to the applicant. For the supply and delivery of recycling bins, the council will seek a financial contribution of **£212 per property**. Monies should be payable upon implementation.

## PROVISION OF PUBLIC ART

The Council will normally expect new developments to incorporate public art and for the appointed Management Company to maintain it, as approved by the District Council via a public art statement. The value of this for the **Vale of White Horse** district will be **£380 per unit of housing / £11 per sqm of commercial development (Index RPIX April 2023)**. Should the public open space and community facilities on the development be intended for public management, a financial contribution based on the values already outlined, for delivery of on-site public art may be sought, along with a commuted sum of 7% of the value of the works to cover the costs associated with monitoring, repairs and maintenance over a 15-year period. The same would be the case for public art contributions that are received for off-site use.

For **South Oxfordshire** developments, and where appropriate, Public Art will be dealt with via planning condition.

## FIRST HOMES

The introduction by the government of the First Homes scheme will require a fee to be paid for the administration of each sale of each home identified as a First Home within a development.

The council will seek a financial contribution of **£168 per First Home sale** which will be due upon first disposal of each First Home.

## MONITORING OF S106 PLANNING OBLIGATIONS

The completion of a planning obligation involves the district council<sup>1</sup> in various administrative/monitoring tasks, which have a cost. This work is directly related to Section 106 agreements, which are themselves necessary to enable development. The council recovers the cost of the administration and monitoring of each agreement through Section 106 monitoring fees, which should be paid upon completion of the S106 agreement or at commencement of development, as costs are incurred immediately. Costs are set out below:
